# CONFIDENT

## Burglary Protection Solution

The Confident is a user-friendly safe, designed by Fichet-Bauche to offer an ideal and reliable storage for the guests.

### Product Overview

The door frame, laser-cut from a sheet of special steel, is cast in one piece with no joins and the door itself is made of **10mm-thick steel**. The door hinge is protected, inaccessible from the outside, and the bolts are made of strong chrome-plated steel. The body is made of **3mm-thick steel**.

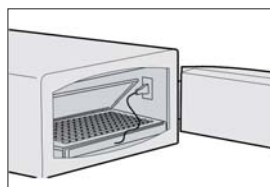

### Locking

The electronic lock offers six different administration codes with a six digit pin. The guest code will be a four digit pin of any choice. **Emergency key override** to prevent the goods from becoming locked in.

### Options

Option 1. This safe is also available with RFID.

Option 2. Charging of electronic devices is also possible.

Option 3. CEU Unit to download and print audit trail.

### Technical Specifications

Dimensions in mm	Confident
External height	475
External width	400
External depth	520
